

Course: Introduction to BusPlanner Maps

Duration: 1/2 day

Overview

The purpose of this course is to discuss the basic tools available in BusPlanner Maps, and how they can be used to enhance the BusPlanner environment. This half-day training session includes instruction on street editing & maintenance, importing & exporting objects and layers, and other BusPlanner Maps-specific tasks.

Goals

This course will discuss the following topics:

- Street editing
- Street properties
- Finding streets
- Label maintenance
- Shapefiles
- Layer management
- Moving objects between layers
- Moving objects between databases
- Working with attributes
- Tools menu
- Cleanup tools
- Redistricting

Audience

This course is designed for staff members responsible for maintaining their transportation street map within BusPlanner.

Prerequisites and recommendations

Students should have completed "Introduction to BusPlanner" and have purchased at least one licence for BusPlanner Maps.
