

Custom Reporting for Administrators

Duration: 2 hours

Overview

New for 11.6, BusPlanner's Custom Reports feature leverages the built-in tools within Microsoft® Report Builder, giving you the power to visualize and export your own unique reports. This short, two-hour course will take you through the process of creating and utilizing custom reports, helping you capitalize on this feature within your own database.

Goals

- Learn to import, build, and export your own custom reports
- Make your reports available on BusPlanner Web
- Understand how to tailor each new report to your unique needs

Audience

This course is designed for advanced BusPlanner users and system administrators who wish to learn and maximize BusPlanner's custom reporting tools.

Prerequisites and Recommendations

Students must have:

- An advanced knowledge of BusPlanner and the BusPlanner database
- Experience using Microsoft® SQL Server and/or writing SQL queries
