

Introduction to BusPlanner: Virtual Edition

Duration: 2 days

Overview

Introduction to BusPlanner is perfect for any staff member that is new to your office (or new to our software). Adapted specifically for virtual learning, this course is designed to give new users the skills and knowledge required to work within the BusPlanner environment.

Users will learn to move around the map, find and locate students (and other objects), assign students to busing under various scenarios, and build and manage bus stops, runs, and routes.

Course Features

- Instruction on BusPlanner Pro fundamentals, focusing on "need-to-know" items
- Practical exercises for hands-on learning
- Q & A opportunities and course materials to help solidify your knowledge

Audience

This course is designed for users that are new to BusPlanner and require a working knowledge of how to use the program.

Prerequisites & Recommendations

Introduction to BusPlanner is recommended for all users of BusPlanner and ideally should be the first course taken.
