

Planning Special Needs Transportation with BusPlanner

Duration: 1 day

Overview

When transporting special needs students, each child is truly unique. You need to be able to plan their trip to school effectively, and communicate required information so that everyone arrives safely and smoothly.

This course helps you understand the various elements that go into special needs routing in BusPlanner Pro, and gives you the tools to do your job efficiently while providing students and parents with superior customer service.

Goals

At the conclusion of this course, students should understand how to:

- Quickly identify each student's specific needs
- Add students to appropriate transportation
- Manage special needs busing on student, run/route, and school levels
- Document and communicate needed information to various stakeholders

Audience

This course is intended for BusPlanner users whose role includes planning transportation for special needs students.

Prerequisites and Recommendations

Students should have completed "Introduction to BusPlanner" and have at least one month of experience actively using BusPlanner.
